HOW TO READ THE TIDES

H is high tide and **L** is low tide, in the station's local time. The number is feet above MLLW, the zero line on nautical charts. A negative number is lower than that line.

BEFORE YOU GO OUT

Check the surf and wind forecast. Tell someone your plan. Know your exit. Wear a leash and a vest. Take your trash with you.

ABOUT THE NUMBERS

Predictions come from NOAA's tide service and describe the astronomical tide only. Swell, wind and weather change what the water does. A station can sit minutes and inches away from your beach.
